

❖ Masternaut Communication Centre

All-in-one tracking, navigation and communication solution.

Vehicle Tracking, Integrated Sat-Nav and Phone, Job Scheduling and Messaging all in one revolutionary system.

Future proof your business and save money

We've designed the Masternaut Communication Centre (MCC) to be a comprehensive tracking and communications solution for your fleet of vehicles. As well as all the functionality of the Masternaut Tracking System, driver essentials such as sat-nav and built in phone, so you're making big savings straight away. Everything is ready to go in one simple installation, taking away the downtime and hassle of having several pieces of kit installed.

Software upgrades are completed over the air so you don't have to take your vehicles out of service to take advantage of new apps, features and updates; they will simply appear on your system next time your vehicles are used.

Who is MCC for?

The MCC is suitable for companies with mobile workers in all industries including field sales representatives, service engineers and delivery drivers.

Messaging and Status Updates

With the MCC it's easy to send and receive messages to/from your mobile team out in the field. Drivers can also send messages back using the touchscreen. Messages may also contain information such as an address, a point of interest or a phone number which can be used to automatically dial or navigate. In addition status updates allow you to see whether a driver is free for jobs, unloading, resting etc. This can be configured to suit the needs of your business.

Job Scheduling

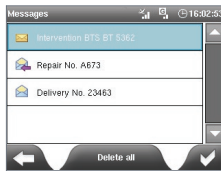

When your business relies on most of your team being out on the road, success depends on your ability to operate efficiently and communicating with your workforce is key to that. Using our web-based X-Schedule you can schedule and manage jobs, sending them instantly to your mobile workers. Drivers can respond using pre-defined answers in drop down menus or free text. Real-time information and updates from your drivers keep you informed of status as the jobs progress. When a job is dispatched to an MCC device, the location information is automatically imported into the sat-nav removing the need for manual keying.

Driver ID

Each of your drivers log-in with a unique PIN at the beginning of each journey. This allows you to keep accurate records for each driver.

Status Control.

Message List.

Sat-Nav

- Full UK mapping
- Speed limit display
- Audible fixed speed camera warnings
- Points of interest
- User-friendly mapping and interface
- Bookmarks allow new locations to be added

Integrated phone

The Masternaut Communication Centre a full handsfree phone system built-in*, allowing drivers to dial a range of numbers that you pre-define in your own corporate phone book. This allows you to restrict which numbers are called, discouraging unnecessary use. Your corporate phone book can be synchronised over the air to all your Masternaut MCC devices. Alternatively you can enable unrestricted calls.

For additional safety, you can activate a feature that prevents use of the phone whilst the vehicle is moving.

**Subject to third party airtime agreement.*

Satellite Navigation.

Integrated Phone Menu.

The Hardware...

Mobile Collection Unit

Hidden away in vehicle.

3.5" Touchscreen Display* 6.5" Optional large screen (for HGVs)

* Detachable to deter thieves. Supplied with a soft pouch for storage.

Loudspeaker

MCC has its own speaker so that it continues to work even if vehicle power has been lost e.g. in the event of an accident.

Button Pad

The button pad incorporates a microphone for hands-free telephony. The private button allows you to switch between private and business mileage.
