ScreenWatcher

Telematics Enabled

Dynamic map-based tools to provide world-class customer service, cost-saving opportunities and finger-tip mobile resource management.

ScreenWatcher provides total visibility of your assets and vehicles combined with powerful tools that help businesses reduce travel time, mileage and vehicle running costs.

Using these tactical tools, it empowers businesses to become more competitive, offer a better service and ultimately win more business. Based on Masternaut's core tracking and telematics system, deployed by thousands of businesses across Europe, ScreenWatcher provides low-cost entry-level, real-time vehicle tracking information available to you in your own password protected area on the Masternaut website. ScreenWatcher provides 95% of the system functionality from one map-based screen that enables rapid up-take and intuitive use. The full package comes complete with free-of-charge mobile device software downloadable from App Stores including Apple™.

ScreenWatcher

Masternaut ScreenWatcher

See the Impact and Take Action

- Superior technology provides twenty-twenty vision over operations
- Use the real-time, second-by-second vehicle updates to take immediate action
- Deploy with the minimum of disruption to your business

The Solution

ScreenWatcher contains a broad range of functionality, features, capabilities and options and is particularly relevant for businesses that use telematics as a daily operational tool in dynamic resource allocation. The solution is designed with the end-user in mind to provide highly effective but non-complex tools for better mobile resource management.

Vehicle & Driver Reports

- Dynamic resource allocation enhances your business productivity
- Utilise Map-Matching and 20-second updates for enhanced data accuracy
Manage, Monitor & Protect

Masternaut's enhanced visualisation of your vehicles helps to pin-point your assets for added security and increases productivity through superior visual vehicle positioning to the road network. ScreenWatcher provides the core track and trace elements now available from the European market leader providing customers with robust, low-risk telematics and the ability to grow the solution as your business grows.

Journey History

“ Now provides companies with 20-second vehicle updates ”
